Dear Raj

Thanks for reaching out.

I am afraid that there is no such thing as low sulphur fuel grades (ECA compliant) with max 0.10% sulphur available in Havana nor Cuba in general.

The gasoil available there is a high sulphur grade in line with ISO 8217:2005 DMA specs, hence the typical sulphur content is between 1,00-1,50%.

Let me know if you need anything further.

Best regards  
Dan-Bunkering (America) Inc.

Hello Michel,

We have a vessel spot off Havana scheduled to sail to Houston.

Please advise if any LSGO or LSFO max 0.10% sulfur is available in Havana on spot/prompt basis ? Quantity 150-200MT.

brgds
